

Explore Open Vascular Surgery for Lower Extremity Arterial Occlusive Disease

LeMaitre is hosting a minimally invasive In Situ Bypass Training Program with Dr. Khanjan Nagarsheth in St. Louis, MO

The LeMaitre® Valvulotome is an innovative instrument that uses self-sizing, self-centering hoops for well positioned, clean valve cutting, decreased wound necrosis and faster patient recovery.

Improve your in situ bypass with the LeMaitre Valvulotome:

- Faster completion times
- Higher patency rates
- Easier fistula finding
- Less invasive procedures

At LeMaitre, we focus on meeting the needs and exceeding the expectations of vascular surgeons with disposable and implantable vascular devices for use in both open vascular surgery and minimally invasive procedures.

Khanjan Nagarsheth, M.D., MBA, FACS is Director of the Division of Vascular and Endovascular Surgery and Director of the Vascular Surgery Integrated Residency and Fellowship Programs at Saint Louis University. A nationally recognized vascular surgeon, Dr. Nagarsheth specializes in peripheral arterial disease, chronic limb-threatening ischemia,

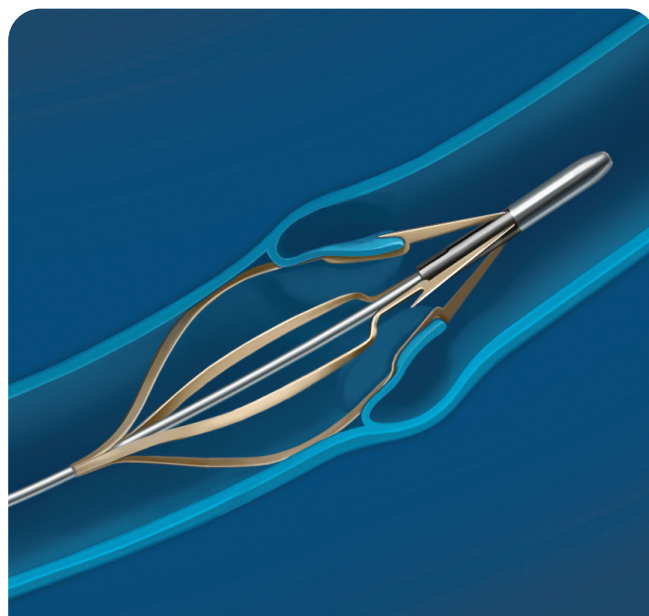

venous disease, pulmonary embolism, and vascular compression syndromes. He has led the development of several innovative multidisciplinary vascular care programs and has served as principal investigator on more than 20 clinical trials. Dr. Nagarsheth has authored over 100 peer-reviewed publications, contributed 50 book chapters, and is widely recognized for his work in vascular innovation, clinical outcomes research, and limb preservation.
